Paul Hobbs - *exploring faith through art*

Talks • Seminars • Workshops • Exhibitions

I make painting and sculpture that deals with social and spiritual issues from a Christian perspective. The artwork is stylistically varied and is of great interest to art students for its concepts and techniques, and proves thought provoking and challenging with every kind of audience, young or old, religious or atheist.

The artwork stimulates discussion about human values and dignity, responsibility and service to others, and stories of faith. Themes include famine, inequality, fatherhood, old age, sexuality, our capacity for violence, suffering, the Beatitudes and the Trinity. There is also a collection of shoes and stories from believers all around the world.

I exhibit in a wide range of venues, leading discussions and giving talks on my artwork. I have taught Art to all levels in secondary schools, and have been showing and speaking in schools for over 25 years.

The materials include paint, collage, wood, steel, and assembled objects. For details please see my website, www.arthobbs.com.
